## INDUSTRIAL TIRES

Also in the industrial sector, tires must face several daily challenges. BKT has coped with this matter by designing a wide range of tires that perfectly satisfy the different needs even in this sector. Therefore, BKT offers three different tire types that are ideal for forklifts: radial, bias and solid. Each type provides specific features highlighting different performance requirements: an extended tire life-cycle, reduced energy consumption, excellent stability and comfort. Moreover, these tires have been specifically designed for the slightest floor marking enabling operations in a clean industrial environment. Discover the full BKT range and choose the right tire for you.

## TECHNOLOGIES AND PERFORMANCE

<b>All Steel</b>	<b>Extra Deep Tread</b>	<b>Heavy Duty</b>	<b>Special Antistatic Compound</b>
<b>Comfort</b>	<b>Cut and Chip Resistance</b>	<b>Cut Resistance</b>	<b>Durability</b>
<b>Handling &amp; Comfort</b>	<b>High Load Capacity</b>	<b>Low Rolling Resistance</b>	<b>Stability</b>
<b>Steering</b>	<b>Traction</b>		

### Radials

Radial tires have cord plies that are arranged running radially from bead to bead around the tire. Sidewall and tread have independent functional features providing more flexibility, great performance, durability, and fuel economy.

### Bias

Bias tires have cord plies that are arranged running diagonally from bead to bead across the tire. Layers overlap forming a crisscross pattern. This design features extraordinary sidewall resistance, puncture resistance and high load capacity.

### Solid

Solid tires are not filled with air or other gases. They consist of several layers made of special rubber compounds or steel. Solid tires provide extraordinary stability, puncture resistance, and high load capability. These maintenance-free tires are mainly used for forklifts and other industrial vehicles.

# LIFTMAX LM 81

LIFTMAX LM 81 has been specially designed for forklift equipment in material handling and industrial applications. This All Steel radial tire offers lower vibration, and greater stability as well as increased durability. The special antistatic tread compound provides excellent wear resistance even under the most demanding operating conditions.

# LIFTMAX LM 63

LIFTMAX LM 63 has been specially developed for industrial and logistics operations. The 3-rib tread design provides low rolling resistance with good wet grip and uniform tread wear with better handling. It is an All Steel radial tire with multilayer steel belts offering lower vibration as well as enhanced stability and comfort.

# POWER TRAX HD SMOOTH

POWER TRAX HD SMOOTH is a bias-ply tire specially designed for port and underground mining operations. The special sidewall protection along with a solid tread prevents cut and puncture damages that are common in such demanding environments. When you need to move heavy-duty loads, Power Trax HD Smooth is your ideal partner.

# SUPER TRAX HD

SUPER TRAX HD has been specifically engineered for forklifts in heavy-duty material handling operations, including port and mining applications. The extra deep tread is made of a unique wear-resistant tread compound ensuring a longer service life. SUPER TRAX HD features a strong casing and a reinforced sidewall resulting in both excellent stability and maneuvering in lift mode. The specially designed rim guard provides protection against flats and wheel damage in the rim flange area.

# MAGLIFT

MAGLIFT has been particularly designed for forklift in industrial and logistic operations. This solid tire features high load capacity and outstanding comfort. MAGLIFT shows excellent cut and chip resistance resulting in a long tire life. Its reinforced structure eliminates slippage risks whilst the special bead shape simplifies mounting operations on the rim.

Solid

# MAGLIFT PREMIUM

MAGLIFT PREMIUM is a solid tire specially designed for heavy forklift operations in port, mining or scrap yard applications. The extra deep tread (25% more compared to the standard version) with its aggressive and robust pattern provides outstanding front and lateral traction in addition to excellent steering control. The unique tread compound ensures high cut and chip resistance resulting in an extended tire life-cycle. Additional features are low rolling resistance and a smooth run.

# MAGLIFT ECO

MAGLIFT ECO has been particularly designed for forklifts. The tire features a wide lug pattern providing maximum stability and optimized load distribution. Its reinforced structure eliminates slippage risks whilst the specifically designed rim guard ensures protection against wheel damage. MAGLIFT ECO shows excellent traction as well as low rolling resistance and low heat built up for improved efficiency.

# MAGLIFT ECO RIB

MAGLIFT ECO RIB is a solid tire specially designed for GSE trailers (ground support equipment). Its reinforced structure eliminates slippage risks whilst the specifically designed rim guard ensures protection against wheel damage. MAGLIFT ECO RIB shows excellent steering control, high stability, low vibration and self-ment for trailers. Additional features are low rolling resistance and low heat built up for improved efficiency.

## Load Index Table

The load index is a code that defines a tire's maximum weight capacity at the speed given by its speed symbol provided that the usage conditions recommended by the Manufacturer are fully complied with.

### Corresponding values of load index (LI) and load capacity per wheel (kg)

LI	kg	LI	kg	LI	kg	LI	kg
50	190	85	515	120	1400	155	3875
51	195	86	530	121	1450	156	4000
52	200	87	545	122	1500	157	4125
53	206	88	560	123	1550	158	4250
54	212	89	580	124	1600	159	4375
55	218	90	600	125	1650	160	4500
56	224	91	615	126	1700	161	4625
57	230	92	630	127	1750	162	4750
58	236	93	650	128	1800	163	4875
